41st Annual Cream of the Crop

CHAROLAIS FEMALE SALE

Dorotheann Rogers

Doug Rogers

Bren Hall

David King

James Sullivan

Jerri Rogers

Dear Charolais Friends,

We would like to welcome you to our 41st Annual "Cream of the Crop" Sale. There is a great demand for Charolais genetics in the commercial market. Commercial cattlemen and the feed yard managers are demanding cattle that put weight on quickly and efficiently and they both know that Rogers Bar HR Charolais do just that. Rogers Bar HR Charolais genetics are in high demand due to the fact that our cattle have been performing and will continue to perform on both grass and feed. Our herd is a performance-based herd. The cows either perform to our high standards with no special treatment or they are sent to the market. It is easier to keep a good cow than a sorry cow.

For the past 57 years we have been working hard to improve our cattle, and our hard work is paying off. **According to AICA, 26 of the top 50 cows for Total Maternal in the Charolais Breed are Rogers Bar HR cows! No other breeder comes close to this achievement.** In addition, we have produced trait leaders in Weaning Weight, Milk, Maternal Calving Ease, Fat, Marbling, and Hot Carcass Weight for the Charolais breed.

Why are our EPDs so high? It was not by magic but by hard work and persistence. We pay very close attention to our contemporary groups. We do not stir the milk; we let the cream rise to the top. We make direct comparison with other breeders either through heifer purchases and/or AI breeding. We put our bulls on Beef Improvement Federation approved tests and see where they fall. This year we did it again. **We had the top Charolais bulls on both the 2015 Florida and the 2015 Hinds bull tests.** On the Florida test we were #1 out of 133 bulls!

Some people say that milk is a trait that Charolais breeders do not need to pay attention to. You might agree if you only care about half your calf crop; remember that half of your calves are heifers. We do not creep feed our calves, and we like heavy weaning weights. In order to do that we have good-milking cows and cattle that perform on grass. Unlike chickens and hogs, cattle can get fat on grass, a commodity that we have an abundance of in the South.

All pictures that you see in the catalog were made in the pasture with the cow's working clothes on. They were not washed and prepped for the pictures. We like showing our cattle as they would look in your pastures.

We have the selling philosophy of not just wanting to sell you an animal today, but for many years. We can only do that by making you happy on every purchase. So buy your cattle with confidence.

We look forward to seeing you May 14th at the ranch.

Yours for Better Charolais,
Dorotheann Rogers & Doug Rogers

Saturday, May 14, 2016

12:30 p.m. • At the Ranch • Collins, Mississippi
